Samiha Islam	1931393642
Md. Rifat Ahmed	1931725042
Faija Islam Oishe	1821720642

# Introduction

Our project is basically for them who run the fitness center. Those who will operate the software, first they will get information of gyms in a certain area and be able to add or update the information of all the members of their center and calculate their income and expenditure etc and sell exercise equipment through this one software. On the other hand, users can buy exercise equipment at home and users can become a member of that organization by purchasing a membership package and as a result they will get some special benefits.

# Our Target Audience

Our main audience are health conscious men , women and children of all ages who like to change their lifestyle . Just as they can buy products at home and they can also subscribe membership at home.

# Why we need this Application ?

- ▶ As the pandemic causes more restrictions, this system will enable members to book and schedule their own time slots through online.
- ▶ This will eventually decline the risk of being infected. This system will arrange a benefits to both parties. Besides, customers will able to buy fitness equipment's and certain products through online.
- ▶ However, the gym members will get special discounts on the same equipment's and products. Moreover, certain facilities like personal trainer, Buy Membership Online, Discount offer etc. will be available for the members only.
- ▶ On the other hand, those who run a fitness center used to need two different software's. One is to manage their gym data and the other is if they were selling any product. But now they can do these two things together through a software and at the same time can register for membership online at home.

# Function & Specialty

## **For User –**

- ▶ View and search all the available gyms in an area
- ▶ Buy Equipment / Product
- ▶ Buy Membership Package
- ▶ Set Own Workout Planning
- ▶ Assigning Trainer Personally
- ▶ Update their full account
